2nd Year **Dean's List** Computing student at **Imperial College London** with strong software engineering and mathematical foundations. Skilled in Python, C#, Haskell, Kotlin, and C. Experienced in collaborative software projects, problem-solving, and delivering end-to-end technical solutions.

Education

Imperial College London, Master of Engineering - MEng Computing Sept 2024 - June 2028
86%, predicted 1st Class. Dean's List (top 10%).

Altrincham Grammar School for Boys (Sixth Form) 2022 - 2024
A Level: Mathematics (**A***), Further Mathematics (**A***), Computer Science (**A***), Physics (**A***), Chemistry (**A***)

Altrincham Grammar School for Boys 2017 - 2022
11 GCSEs at grade **9-8** including Maths, Computer Science, English and Science

Skills

- **Programming Languages:** Python, C#, C, C++, Haskell, Kotlin, Java, JavaScript, TypeScript
- **Development & Data:** React, Node.js, Android Studio, Jetpack Compose, SQL, Firebase, Flask, Keras
- **Tools & Systems:** Git/GitHub, Linux, ARMv8 Assembly, Raspberry Pi, Microsoft Access
- **Languages:** English (fluent), Russian (native), German (basic)

Experience

Data Cleanser, The River Restoration Centre Feb 2025 - Ongoing

- Rebuilt a legacy Microsoft Access database to improve usability, performance, and maintainability.
- Led end-to-end development: data structure design, UI overhaul and workflow streamlining.
- Worked with manager on requirements while independently handling design, implementation and testing.

Data Science Intern, Hartree Centre STFC Aug 2023 - Aug 2023

- Collaborated with team to identify PII combinations within the National Survey dataset.
- Produced a detailed report and delivered a presentation of findings to the Data Science group.
- Received training in a range of data science techniques and methodologies.

Projects

Flatmate Finding App - Amazon Undergraduate Engagement Programme Aug 2025

github.com/dorianturner/Roomie

Tech stack: **Kotlin, TypeScript, Google Firebase, Jetpack Compose**

- Developed an Android app to match flatmates and submit joint rental offers, with backend services in TypeScript and Firebase integration.
- Designed Firestore data structures for profiles, messaging, and compatibility metrics.
- Collaborated in agile sprints with Git workflows and code reviews under Amazon engineers' guidance.

ARMv8 Systems Project – Imperial College London Jun 2025

Tech stack: **C, ARMv8 Assembly**

- Built an ARMv8 emulator and assembler; later implemented Raspberry Pi GPIO programs to control LEDs and cocktail-making hardware.
- Solely responsible for software of final stages, integrating GPIO, I2C LCD display, and button input.
- Presented project to university staff and Arm engineers.

ICHack 2025 – Technical Interview Practice Web App Feb 2025

github.com/KOLESNiii/ichack25

Tech stack: **HTML/CSS, JavaScript, Python, Flask, Keras**

- Created web app with AI-driven facial-cue detection, transcription, and analytics to simulate technical interviews.
- Built Flask backend for video processing and AI inference; integrated real-time feedback in the front end.
- Delivered functional demo at ICHack 2025, presenting to Helsing engineers and university staff.
